- Completed basics of java & data Structures and Algorithms.
- Completed Web Development training from Internshala.
- Android Application Development.

SKILLS AND ABILITIES

Programming
C/C++ Java Python Kotlin AndroidStudio

Front End
HTML CSS JavaScript ReactJS

Back End And Data Tools
PHP SQL MySQL

Other Skills
Data Structures Algorithms

PROJECTS

Personal Budget Tracking Application | Jul 2023 – Sep 2023

- The budget tracking application is designed to help manage personal finances more effectively.
- Utilizes machine learning for analytics and blockchain for security.
- The app provides a user-friendly and accessible interface suitable for a diverse audience.

Nivas Navigator | 10 Nov 2023 – 23 Dec 2023

- Nivas Navigator brings all nearby PG options into one platform, making it easier for users to find accomodations.
- Nivas Navigator uses HTML, CSS, and Bootstrap for design, javaScript and React for interactivity, PHP for backend tasks, and MySQL for data storage.

Facial Recognition Attendance | 10 June 2024 – 16 July 2024

- The system leverages facial recognition technology to log attendance without manual input
- It provides a real-time dashboard for monitoring attendance.
- The system uses secure login and controlled access levels, protecting sensitive information.

POSITION OF RESPONSIBILITY

- Council Member | Code Club, Barak Valley Engineering College

HOBBIES AND INTERESTS

Sketching, Badminton
